

This is 2 Proposal for 2 virtual projects

My Proposal

Dear Ahmed M,

This is Ahmed, Certificated of Data Analytics from Google, and graduated from data analysis Nanodegree from Udacity. Also, I received my B.sc in Communication engineering from Delta university.

After I examined your requirements, I found that this is my area of expertise, and I have worked on a previous project similar to yours, You can check it on GitHub:

<https://github.com/engzakii/Project-Investigate-a-Dataset-TMDB-movies-dataset>

Project aspects:

- Extract data from primary and secondary resources.
- Transform it and perform appropriate statistical analysis.
- Organize and Load it with the right format.

Based on project requirements I will take 10\$ per hour and it takes 10hours.

My Proposal

Dear Ali S,

This is Ahmed, Certificated of Data Analytics from Google, graduated from data analysis Nanodegree from Udacity, And Certificated of data analysis from data camp.

After I examined your requirements, I found that this is my area of expertise, and I have worked on a previous project similar to yours, You can check it on GitHub: <https://github.com/engzakii/Project-Investigate-a-Dataset-TMDB-movies-dataset>

I can finish your projects by this steps:

- Extract data from primary and secondary resources.
- Transform it and perform appropriate statistical analysis.
- Organize and Load it with the right format.
- Visualize your data using plotly or Tableau

Based on project requirements I will take 50\$ and it takes 3 days
